

**NATURAL GAS AND ELECTRICITY CURTAILMENT SURVEY**  
**06.20.24**

The objective of the survey is to illustrate to federal and state policymakers that manufacturing companies across the U.S. are being curtailed on natural gas and electricity and the frequency is getting worse every year. Federal and state policymakers need to take action because it takes many years to build the infrastructure needed to assure affordable and reliable natural gas and electricity infrastructure.

All surveys are considered confidential. IECA will aggregate the input and develop a report on the findings which will be used in advocacy by the coalition. **Complete the survey and email to Marnie Satterfield ( [msatterfield@ieca-us.org](mailto:msatterfield@ieca-us.org)).**

1. What industry are you in?

Industry	Check all that apply
Chemicals	
Plastics	
Steel	
Iron Ore	
Aluminum	
Paper	
Food Processing	
Fertilizer	
Insulation	
Glass	
Industrial Gases	
Pharmaceutical	
Consumer Goods	
Building Products	
Automotive	
Independent Oil Refining	
Cement	
Other (please list)	

2. How many times in the last three years has your natural gas supply been curtailed? \_\_\_\_\_

---

3. Has the frequency of natural gas curtailments increased? Yes \_\_\_\_\_ No \_\_\_\_\_

4. How many times in the last three years has your electricity supply been curtailed? \_\_\_\_\_  
\_\_\_\_\_

5. Has the frequency of electricity curtailment increased? Yes \_\_\_\_\_ No \_\_\_\_\_
